Press Release

MM Lampadari presents the new lighting collections at the Salone del Mobile 2024

Milan, 15 April 2024

MM Lampadari is pleased to announce the presentation of its new lighting collections at the prestigious Salone del Mobile 2024.

The event will be held at the Pianca&Partners Contract HUB showroom Via di Porta Tenaglia, 7N3, Moscova area, and will offer guests an exclusive preview of the company's latest creations.

The new collections represent a return to the roots of design, skilfully combining metal with precious Murano glass. This choice reflects MM Lampadari's ongoing commitment to enhancing craftsmanship and celebrating the deep family connection with the glassworks. It is a clear sign of our commitment to be bearers of an elegant and refined style, always keeping alive our heritage of corporate know-how and adapting it to the needs of modern times.

In this context, the new lighting proposals stand out for their refinement and the unmistakable stylistic imprint of the craftsmen, combined with a contemporary, elegant and measured aesthetic. Each piece reflects the attention to detail and passion for creating luminous works of art that transform environments into unique and evocative spaces.

We warmly invite you to visit our showroom during Salone del Mobile 2024 and discover for yourself the excellence of our new collections. MM Lampadari continues to be a benchmark in lighting design, offering high-quality solutions that satisfy the most demanding tastes.

For further information and to arrange meetings or interviews during the event, please do not hesitate to contact us.

The Collections

Tumbler design by Lo Scalzo Moscheri

In a fusion of elements reminiscent of the refined world of mixology, the Tumbler family is distinguished by its timeless elegance. The precious crystal glasses are handcrafted with 45-degree diamond-point engravings, giving them a unique lustre. The galvanic gold and matt black finishes blend harmoniously, creating works of art to be admired.

Babilonia design by Giorgio Biscaro

Inspired by ancient architecture, Babilonia is characterised by a precise geometry that evokes the imposing proportions of ancient structures. The glassy diffuser with a square base and vertical striations conveys a sense of order and rigour. The polished black nickel structure adapts to the surrounding light, offering a contemporary vision of classicism.

mmlampadari

luce italiana dal 1966

Curl design by Giorgio Biscaro

Curl combines significant volume with surprising lightness. The solid curved metal frame supports a translucent chocolate-coloured fabric diffuser, while a ribbed glass element in the centre adds luminosity and verticality to the lamp. The overall effect is one of elegance and warmth, perfect for cosy and refined environments.

Trigon design by MM Lampadari workshop

Trigon is a lamp made of satin-finish Murano glass blown by mouth using the complex still technique. The curves of the glass surface recall the shape of a stone polished by time, diffusing light in a soft and enveloping way. This unique piece maximises light dispersion, creating a relaxing and evocative atmosphere.

Eos design by MM Lampadari workshop

Eos is an elegant lamp characterised by a supple metal arc and a mouth-blown Murano glass diffuser. The textured surface of both the metal with a three-dimensional coating and the crystal glass regulite give the piece movement and charm, while its excellent light refraction makes it ideal for creating harmonious suspended compositions or for single use, adding a touch of refinement to any ambience.

Each collection represents a unique interpretation of luminous design, fused with the craftsmanship and creativity of the master glassmakers and designers involved.
